

Fittera Gym Management System - New Features Guide

We have updated the Member Directory on your dashboard with new tools to help you manage memberships more effectively. Here is a quick guide to what's new.

1. Advanced Overdue Filtering

You can now check which members are overdue as of a specific date in the future or past.

- **How to use:** Click the "**Overdue Only**" button in the Member Directory.
- **Date Picker:** A calendar icon will appear next to the button. You can select any date to see who will be overdue by that time.
- **Why it's useful:** Use this to plan ahead and see how many members will need to renew their membership by the end of the week or month.

2. "Due Today" Quick Filter

We've added a one-click button to see exactly who is on their last day of membership.

- **How to use:** Click the "**Due Today**" button.
- **Visual Cues:** Members expiring today are highlighted in **orange** with a "**DUE TODAY**" badge.
- **Why it's useful:** This is the perfect time to catch members while they are at the gym and remind them that today is their last valid day.

3. Member Deactivation (Individual)

To protect your business data and reports, we have updated how members are removed from the active list.

- **What changed:** The "Delete Member" button is now "**Deactivate Member**".
- **Safe Data:** When you deactivate a member, they are removed from the active dashboard list, but **their payment and attendance history is preserved**.

4. User Management (Bulk Deactivation)

For larger cleanup tasks, the User Management page allows you to remove many overdue members at once.

- **How to access:** Click "**User Management**" from the main dashboard.
- **Bulk Filtering:** Use the date selector to control exactly how "aggressive" your cleanup is.

Example Scenario: Imagine today is **June 1st**.

1. If you pick **June 1st**, the list will show **EVERYONE** who is overdue right now.
 2. If you pick **May 1st**, the list will **ONLY** show people who have been overdue for **at least one month**. This is great if you want to keep recent overdue members in your list but remove those who haven't visited in a long time.
- **Secure Cleanup:** Click the "**Deactivate Members**" button. For security, you will be asked to enter your **Admin PIN** to confirm.
 - **Result:** All selected members will be moved to the inactive list in one go, while keeping their historical data safe for your revenue reports.

Tip: To see your full member list again at any time on the dashboard, simply click the "**Show All**" button on whichever filter is active.
